

Student Internship Program

Duration: 2 months

Location: Work from home/college

Selected intern's responsibilities include:

- Promote the Internet of Things and Machine Learning online training.
- Increase the awareness about IoT and ML in your college by sharing project videos, promo videos, etc. over various social media channels.
- Organise at least one 'Webinar on IoT and ML' in the college or organise an 'IoT and ML meet-up.'

Who can apply? Only those candidates can apply who:

1. are available for the work from home and can start the work from 20th of January 2020. A break will be given during the exams.
2. are available for a duration of 2 months.

What can you learn and earn?

Regular training: via phone calls and webinar to sharpen your sales, marketing, and communication skills as well as concepts of IoT and Machine Learning.

Stipend: This is a performance-based internship. You will be paid Rs.500 on every registration for the online IoT & ML Training that you ensure.

Certificate: on the successful completion of the internship. To complete the internship, ensure that all the three above responsibilities are completed.

In addition, the top three performers will be awarded a '*certificate of excellence*'!

Thanks for submitting the form. You will receive an E-Mail within 30 minutes from the Human Resource (HR) team with an update on your application.

30 minutes.
